Specialist manufacturer of products for the rail industry

## Croydon Tram Network (Transport for London) Tram Points Heating

As part of continued maintenance and upgrades, GrayBar installed Temperature Probes for both Trackside and Street Level locations.

### Trackside:

Using IP66 GRP Weatherproof Enclosures, these have been fitted to a number of cubicles on the Network, to allow them to continue to function and extend the working life of the Cubicles.

### Street Level:

These Temperature Probe housings are aluminium and are also further protected by a Hot Dipped Galvanised Cage, giving added protection and security for cubicles situated in the busy urban centre of Croydon.

**GrayBar offer a comprehensive range of Tram Point Heating solutions, in; stainless steel, mid steel and GRP.**
