

Case Study

BACKER GROUP MEMBER

Specialist manufacturer of products for the rail industry

Watford Junction

Indicator Station

GrayBar were asked by Siemens to design and manufacture a solution that would allow both the Train Driver and Station Attendant to have visibility when the train was cleared to leave.

The resulting collaboration delivered platform indication stations using LED pilot lights, in specially designed GRP enclosures. We also supplied GRP Dis Boxes to allow testing, maintenance and also any future modifications that may be required.

Variants of this solution were successfully installed and commissioned on Platforms 6,7,8,9 and 10.

GBK4013 - RA Indicator Station, Twin
GBK4014 - RA Indicator Station, Single

Watford Junction -
GBK4013 - RA Indicator Station, Twin
